

## Make your own Daffodil

### *Instructions*

*Print out stem and leaf templates onto strong green card.*

*Print out petals on strong yellow card.*

*Print out flower trumpet on yellow paper*

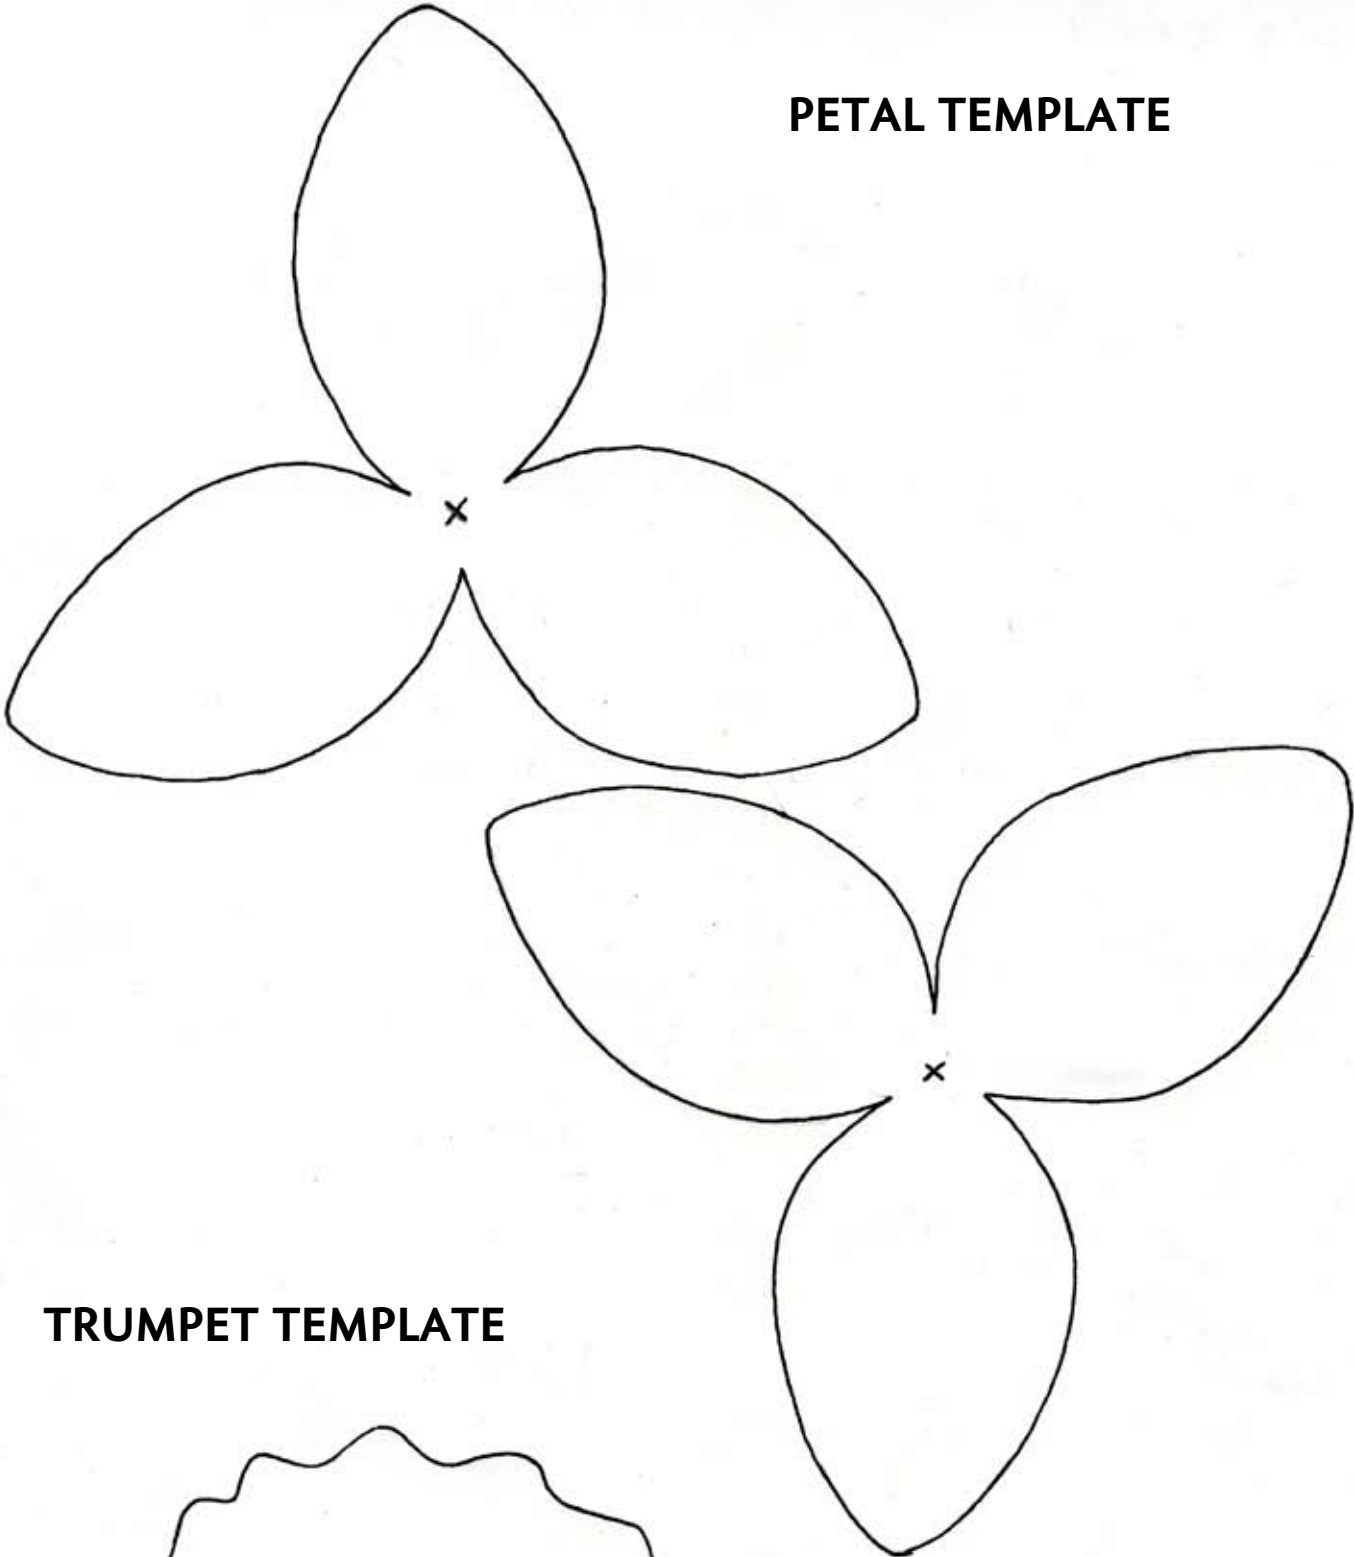

*(you will also need a large thin paperclip).*

- Cut out rectangular stem and twist into a narrow cone shape of roughly 1 cm thick at the top and no more than 3cm thick at the base. Secure it with clear tape along edge.
- Cut out leaf templates and snip along the dotted lines making sure not to cut too much.
- Push slots A & B together to form a cross shape '+', make sure both edges are flat to table surface.
- Carefully mark on the base of stem the points where the leaves will slot and make 4 cuts of approximately 4cm deep.
- Slot the leaves into the stem and adjust to stand straight, then secure with clear tape.
- Cut out each petal shape and placing one on top of the other, carefully pierce a hole in the middle of them (*the best way to do this is to use some blutack underneath and a thin pencil or pen*).
- Twist one set of petals so that you can see all 6 petals.
- Cut out the trumpet on yellow paper, and bend into a cone shape. Making line A & B meet to form a straight edge, and fix with some clear tape.
- Crease the tab of the trumpet along the centre and thread through the holes in the petals securing at the back with clear tape.
- Make one bend in the paperclip to form an 'L' shape and thread one half through the paper trumpet & petals and the other half down into the stem. Secure the trumpet with tape if required.
